

PARTHASARATHI M

Frontend Developer → AI Full-Stack Developer

Chennai, India | parthasarathi0404@gmail.com | [Portfolio](#) | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Frontend Developer with hands-on experience building production dashboards and CRM applications using React.js, JavaScript, Tailwind CSS, and SQL Server on a low-code/no-code enterprise platform. Currently transitioning into AI Full-Stack Development — building React.js applications end-to-end, learning backend and database integration, and developing local AI-powered tools using Docker, Ollama, and n8n (RAG pipelines, workflow automation). Combines strong SQL and data-modeling skills with growing full-stack and AI engineering capability.

CORE SKILLS

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Responsive Design, React Hooks (useState, useEffect, useContext, useMemo, custom hooks)

Backend & Databases: SQL Server (Advanced), Stored Procedures, T-SQL, REST APIs, JSON, Node.js (learning)

AI / Automation: Docker, Ollama (local LLMs), n8n Workflow Automation, RAG Pipelines, Prompt Engineering, Vector Embeddings

Tools & Platforms: Git, GitHub, VS Code, Chrome DevTools, Postman, Vercel, Low-Code/No-Code App Development

EXPERIENCE

Programmer Analyst (Frontend Developer) | Sterlo Pvt Ltd

Aug 2024 – Present

Built and maintained 3 enterprise modules (CCRMS, CRM, Insurance & License Management) on Sterlo's internal low-code/no-code platform

- Designed and developed dashboard and application UIs in HTML, CSS and Tailwind CSS, then authored the SQL Server queries and stored procedures that map real-time data into every widget, table, and KPI metric.
- Engineered JavaScript event-driven scripts (GetCtrlProperty, SetCtrlProperty, CallApi) for form validation, duplicate-record checks, and conditional show/hide logic — reducing data-entry errors across modules.
- Authored and optimized complex T-SQL queries across multiple schemas (crm, ccrms, cgr, pnt, tms) using CTEs, STRING_SPLIT, CROSS APPLY, and FOR JSON PATH to power dashboard KPIs, reviewer task assignments, and role-based access control.
- Diagnosed and resolved frontend and backend issues using Chrome DevTools and query validation, ensuring production stability across CCRMS, CRM, and Insurance/License modules.
- Used Claude, ChatGPT, and GitHub Copilot as part of a daily AI-assisted development workflow to accelerate delivery and catch issues earlier.

PROJECTS — AI FULL-STACK & FRONTEND

n8n + Ollama RAG Chatbot — React, n8n, Ollama, Vector Store

- Built a local, privacy-first RAG chatbot pipeline using n8n workflows, Ollama (nomic-embed-text embeddings), and a Simple Vector Store, with a React frontend for resume upload and Q&A.
- Developed a custom resume-extraction pipeline in JavaScript with PDF parsing, OCR fallback, section detection, and chunk generation for embeddings.

React Todo & Student List App — React.js, Vite, Vercel

- Built and deployed a full CRUD task-management app using React hooks (useState, useEffect, useContext), with component-level state management and persistent favourites.

Souled Store E-Commerce Clone — HTML5, Tailwind CSS, JavaScript

- Recreated a full e-commerce experience with mobile-first responsive design, real-time product search/filter, and a working cart system in vanilla JavaScript — deployed on GitHub Pages.

GreenDen & LinkedIn Audit Landing Pages — HTML5, Tailwind CSS

- Designed and shipped two multi-section, conversion-focused landing pages with responsive layouts, deployed on GitHub Pages and Vercel.

EDUCATION

B.E., Electronics & Communication Engineering

SRM Valliammai Engineering College, Anna University, Chennai — 2024

CERTIFICATIONS

- GUVI Certified — HTML, CSS, JavaScript, Bootstrap, SQL

CURRENTLY BUILDING TOWARDS

- AI Full-Stack Development — Docker, Ollama & n8n workflow automation
- React.js — Advanced patterns, backend integration, and full-stack deployment
